CONDOR'

WHO WE ARE

CONOR BIKES is a Spanish company dedicated to the design, assembly and distribution of bicycles.

Firmly committed to innovation, continuous improvement, teamwork and environmental responsibility, **CONOR** has become a reference brand in the Spanish market.

From 1990...

The story of **CONOR** is a love story about a bicycle that dates back to the 60s. Having inherited the spirit of improvement from Ignacio Orbaiceta, the CONOR brand emerged in 1990 and was established in Egüés, Spain.

With a commercial network that includes more than 1,200 points of sale, CONOR has become a reference brand in the Spanish market.

In collaboration with top-level global suppliers (Shimano, Sram, Bafang...), CONOR launches every year a catalog with more than 100 references that cover all categories of the sector: from electric bicycles, gravel or road bicycles to bicycles for children, accessories and spare parts.

OUR BIKES

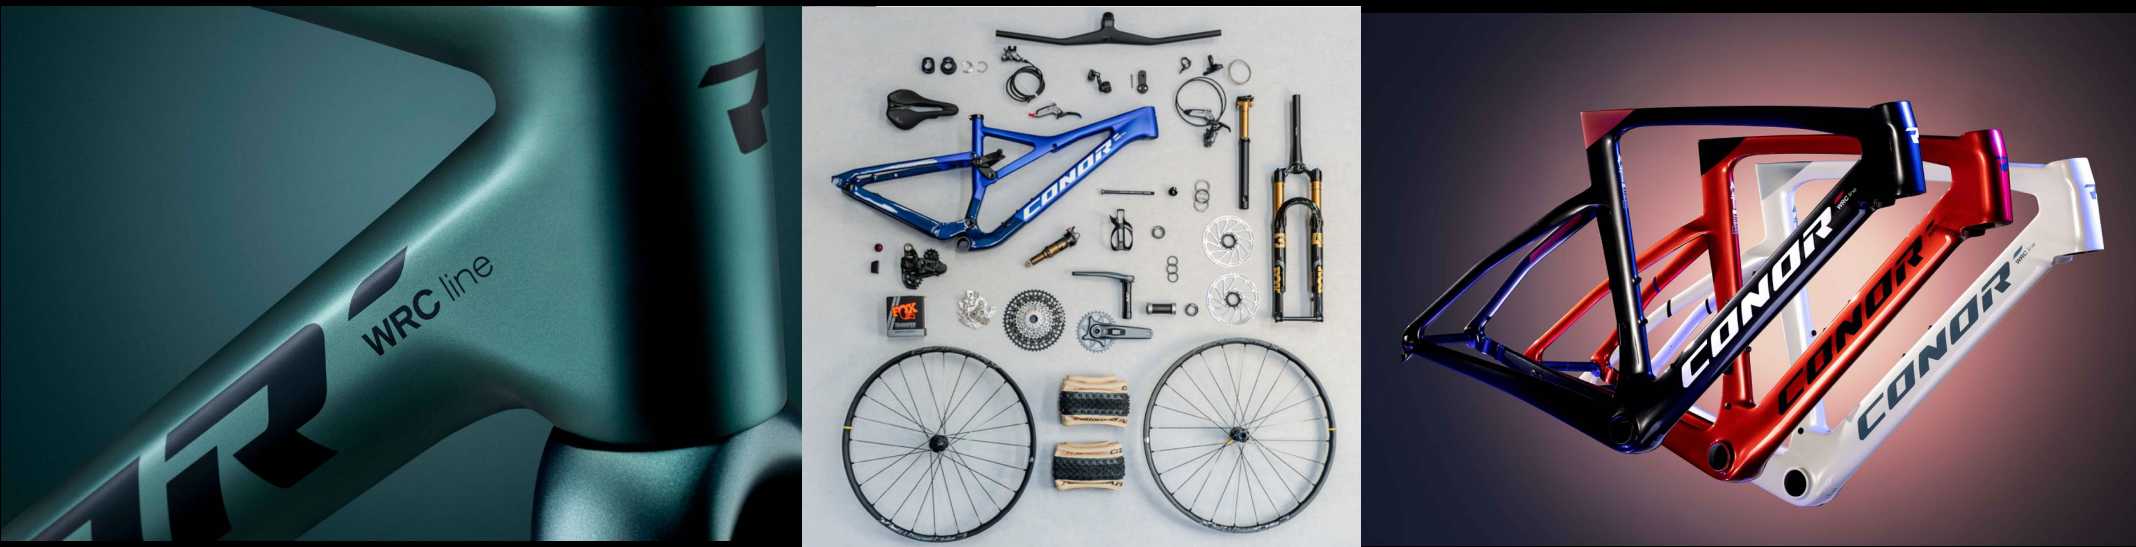

Electric and traditional bicycles in all categories (urban, mountain, road, children, cargo...) adapted to market trends.

Bicycles that cover a wide price range and adapt to all types of audiences. We are committed to sustainability, mobility and sports with family and friends.

Design, adaptability, quality and durability.

WRC LINE

Inspired by the world of competition, we have created a range of bikes aimed at a specialised public, technical cyclists who are passionate about design and quality.

WRC Line bikes are assembled one by one by our technicians, a specialised team that prepares each bike and keeps our customers informed of the process.

One of the distinguishing features of the WRC Line is that the carbon bikes in this category allow for greater customisation of components and adjustment to suit each customer.

A person is riding a mountain bike through a muddy trail at sunset. The sun is low on the horizon, creating a strong golden glow and lens flare. The bike is splashing through the mud, and the brand name 'CONDOR' is overlaid in the center of the image.
